

G2 Systems, LLC To Provide Stone Coast Fund Services, LLC with Powerful Tax Analysis Tool, TaxGopher™

Boston and New York – October 14, 2009 – G2 Systems, LLC, an innovative software and consulting firm specializing in investment management, accounting and operations systems, announced today that it will provide Stone Coast Fund Services, LLC with TaxGopher™. This powerful tax analysis engine delivers a comprehensive account of the tax ramifications of a fund's trading activities. Stone Coast Fund Services, LLC provides independent fund administration, administration oversight, and consulting services to onshore and offshore hedge funds.

“Because of new and complex tax rules, tax analysis of portfolios can be very challenging,” said George Michaels, Co-Principal of G2 Systems, LLC. “TaxGopher™ greatly streamlines the process by analyzing trade data and identifying tax events, such as wash sales and constructive sales. It's a unique product that provides a crystal clear picture of the tax ramifications of trading activities.”

“We anticipate enormous time savings and accuracy from using TaxGopher™ and consider it a strategic enhancement of our fund administration services,” said Marc Keffer, Principal of Stone Coast Fund Services, LLC. “TaxGopher™ will permit us to give portfolio managers up-to-date reporting on disallowed losses, allowing them to fine tune their trading and optimize their tax exposure. We are impressed by its robust out-of-the-box reports and the ease with which it integrated with our portfolio accounting platform.”

About G2 Systems, LLC:
