### **Tax Gopher™ Sales Prompt New Hires at G2 Systems**

#### **Leading IT Solution Provider Announces Increase in Software Sales and New Hires, Including the Appointment of Veteran Financial Services Executive, Brian Roberti**

**Boston and New York – April 5, 2010** – G2 Systems, LLC, a boutique software and consulting firm serving the dynamic needs of hedge funds, brokerage firms and fund administrators, today announced that TaxGopher, its cost basis reporting solution, is now driving wash sales reporting for more than 200 hedge funds. “G2 launched TaxGopher at the end of the 2<sup>nd</sup> quarter 2009, and despite unfavorable market conditions, we’ve rapidly garnered significant market share,” said George Michaels, Principal at G2 Systems.

G2 has also announced five new hires, largely in response to the success of TaxGopher. Veteran financial services executive Brian Roberti joins G2 as head of Sales and Marketing. Brian will also be responsible for developing new business alliances and opportunities while maintaining current client relationships.

Most recently, Brian has held sales leadership positions at financial technology firms offering automated trading platforms and services. He successfully grew the sales team at Edge Trade – an agency-only broker and provider of electronic trading and execution services and helped the firm achieve its aggressive revenue growth targets and exit strategy. Prior to that he worked for 10 years at Advent Software, a leading provider of investment management software, where he served in a number of market-facing management positions spanning Sales Director and VP Strategic Partnerships. Brian holds a BS in Mathematics from the State University of New York in Albany and NASD/FINRA Series 7, 63 and 24 licenses.

“Brian brings a wealth of experience that will help G2 continue to move forward and grow in 2010 and beyond,” said Michaels.

“I’m very excited to be joining G2,” said Mr. Roberti. “I am thrilled to be named to this new role and I look forward to working closely with George on new sales and business alliances in the years ahead.”

To keep pace with software sales, G2 has also hired additional engineering and accounting and operations staff. G2 announced four new Software Engineer positions and one Accounting and Operations appointment. Sudhir Chawla joins G2 as Senior Software Engineer while Rajdeep Saha, Jiaqi Cui and Michael Lalka come on board as Software Engineers. Sudhir has extensive experience building front, middle, and back-office financial services systems. He has led custom and vendor technology implementations at investment banking, asset management and hedge fund firms, including Merrill Lynch, Bear Stearns, Morgan Stanley and Tudor Investment Corporation. Sudhir holds Masters Degrees in Computer Science and Economics.

Rajdeep holds a PhD in Physics from the University of Rochester. His post doctorate efforts include work on the adoption and usage of Signal Processing algorithms for the simulation of quantum dynamics at the Yale Chemistry Department.

Jiaqi (Jean) Cui is a recent MIT graduate with a joint major in Humanities and Engineering and a minor in Economics.

Michael Lalka is a 2006 graduate of Tufts University with a BA in Computer Science.

Additionally, G2 named Charles Saluti as Accounting and Operations Consultant. Charles worked previously at Eagle Investment Systems as a business analyst for Eagle's partnership allocation system: PT Plus. Prior to Eagle, he worked in hedge fund accounting at BISYS Alternative Investment Services (formerly Hemisphere Financial Services).

"The expansion of our team further strengthens our ability to meet the needs of our clients and allows G2 to become an even stronger player in the financial services technology sector," said Michaels.

#### **About: G2 Systems, LLC:**

G2 Systems, LLC, ([www.g2systemsllc.com](http://www.g2systemsllc.com)) is a boutique software and consulting firm that serves the dynamic needs of hedge funds, brokerage firms and fund administrators with solutions that help clients improve their business operations.
